

Design Enzo Berti

The aerial view of **OASI** collection recalls typical forms of tropical atolls, the particular coral islands of the Indian and Pacific Oceans.

It is available also individually, but at best in-group because they constitute a proper **seating system**. OASI is made of marble with seat in heat-treated ash; it is suitable for waiting areas, both inside and outside. The lightness of the seat is given by vertical rhythmic succession of full and empty; 3-sanded Travertine layers do exalt materiality and intrinsic marble characteristics. The flowing lines of the contours recalls organic shapes, those are perfect in their natural irregularity.

The substance formed thousands of years ago and shaped in its authenticity gives volumes to conversation islands and waiting rooms.

It is almost inevitable that Kreoo (and its natural materiality, skill in interpreting and working marble) enters also the office world where the limit between home and office, indoor and outdoor almost disappears.

TECHNICAL DATA

Propose materials:

Marble: Travertino Paglierino and Travertino Noce.

Wood: heat-treated ash (suitable for inside or outside)

Sizes:

3 available sizes:

length cm 125 X wide 77 X h cm 39

length cm 110 x wide 90 X h cm 39

length cm 180 x wide 71 X h cm 39

Mechanism:

Marble layers are inserted in 3 metal tubes

Note:

Marble do not emit harmful substances in the environment, it does not promote the growth of bacteria and mold organism. It is fireproof and, in case of fire, it does not release toxic gases. Any marble can be treated, polished and sanitized with products with low environmental impact.
