Nodo, contemporary living

Design Enzo Berti

A stunning new design joins the Kreoo Living Collection. Nodo is a multi-functional family of geometric coffee tables and shelves. Each piece is characterized by a natural marble top resting on linear brass profiles.

The visual impact of the marble veining offers a light and organic feel to this contemporary collection. A significant detail of the Nodo design is the elegance of the brass profile's angular joint. This supports the stone top, while giving the appearance of the marble being "suspended" on two sides, creating an unprecedented lightness for a stone table concept. The joint design resembles a knot. In Italian, this word translates to Nodo, which became the collection name.

Available in different heights, sizes and a choice of square or rectangle base, the Nodo Collection offers four models that can be installed separately or as innovative modular compositions.

The Nodo "top" comes in a choice of a solid marble slab, or any of the exquisite, hand inlaid designs of Kreoo's Ducale Collection.
