## TAO, differences in harmony

### Design Marco Piva

A sculptural, elegant, clean shape. TAO free-standing washbasin, designed for Kreoo by Marco Piva, expresses the strength running through matter. A strong, graphic design, which reflects marble's intrinsic dynamism.

Metal inserts emphasize the washbasins' sculptural shape along its entire length and diameter, framing in an the exquisite and unique geometries of the natural material.

Tao's essential design draws upon the "Yin and Yang" Taoist philosophy, involving the juxtaposition of bright and dark, full and empty spaces, lightness and heaviness, light and shadow, opposites that meet, in harmony.

The metal insert is not only a beautiful design feature, but adds to the functionality of production. The sectioning of the washbasin allows TAO to be carved from multiple small blocks of marble, reducing the waste of material.

Conceived as free-standing, TAO is also available as countertop washbasin.
