MARBLE TREND
EXTRAORDINARY SURFACES**STONE ITALIANA****ABOUT STONE ITALIANA**

Stone Italiana Quartz Surfaces have excellent physical, mechanical and chemical characteristics. Laboratory tests prove that Stone Italiana products are capable of satisfying demanding conditions and stresses. Stone Italiana guarantees that its materials are manufactured in Italy with most modern equipment, they are free from structural defects and they are first grade quality only. All Stone Italiana materials are ideal for kitchen countertops & vanity tops, floors with high pedestrian traffic, as well as walls & all kinds of indoor surfaces.

STONE ITALIANA

Stone Italiana STAIN RESISTANCE

Tests below referred to quartz base materials, polished finish

Stone Italiana

STAIN RESISTANCE TO HOUSEHOLD DETERGENTS
NOT DILUTED AFTER 16 HRS OF TREATMENT

Tests below using Italian brand name cleaning products.

Ajax bagno	No visible effect
Candeggina Ace	No visible effect
Ammoniaca (soluzione 10%)	No visible effect
Alcol denaturato	No visible effect
Lysoform cucina	No visible effect
Viakal	No visible effect
Vetril	No visible effect
Vim Liquido	No visible effect
Cif multiuso	No visible effect
Mastro Lindo	No visible effect
Clif con candeggina	No visible effect
Finish lavastoviglie liquido	Slightly visible blemish trace
Fornet	No visible effect
Drago Pulisan	No visible effect
Smac brillaio	No visible effect

Stone Italiana

STAIN RESISTANCE AFTER 16 HRS OF TREATMENT

Acetic acid	No visible effect
Acetone	No visible effect
Ammonia	No visible effect
Red wine	No visible effect
Citric acid	No visible effect
Detergent solution	No visible effect
Coffee	No visible effect
Chloramine T	No visible effect
Papermate	Stain
Ethanol Ethyl-Butyl Acetate	No visible effect No visible effect
Olive oil	No visible effect
Coca Cola	No visible effect
Sodium Carbonate	No visible effect
Sodium chloride	No visible effect
Tea	No visible effect
Condensed Milk	No visible effect
Light beer	No visible effect

STONE ITALIANA

STONE ITALIANA QUARTZ SELLING FEATURES

- Stone Italiana is amongst the hardest materials available, therefore it does not scratch easily.
- It is non-porous, extremely stain-resistant, maintenance-free.
- It is strong, flexible, chip- and crack-resistant, thus less vulnerable than natural stone.
- Its colour consistency is due to a computerized technology, high quality raw materials and high standard quality control.

STRONG POINTS

- Large quantities can be produced without variations of quality
- All dimensions and formats can be supplied thanks to CNC machines with water jet facility
- Large quantities can be supplied in the required thickness and/or colours (research into perfect mixes for the customer)
- All surface shaping and edging can be made
- High resistance to mechanical and physical influences (shocks, penetration, compression, flexure, absorption)
- Low thicknesses available and low weight values
- No cracks, defects and fissures
- In particular as regards QUARTZ (composition with a siliceous sands + quartz):
- No absorption of humidity
- High abrasion resistance (anti-scoring), ideal for floors with high 'foot-traffic'
- High resistance to aggression by acid products (anti-stain), ideal for kitchen worktops and bathroom tops
- Pieces up to cm 300 long without joints
- Easy cleaning and maintenance
