

STONE CITY | ZEN

Textures design Marco Piva for Kreoo

The two new textures designed by Marco Piva for Kreoo are born from the incessant search for new possible interpretations of marble. By playing on the refined contrast between engraving and manufacturing techniques, we find a fine counterpoint of lights and shadows, full and empty volumes, soft and decisive lines, which transform an apparently linear material into a three-dimensional design element.

Both Stone City and Zen are modular natural stone decorations in 60 x 60 cm format, 2 cm thick, fabricated with refined milling technologies with a cutting-edge CNC machine, to be then completed with a careful handcrafted finish, rigorously done by hand.

STONE CITY: Marble skyline

Stone City is a texture evoking the skyline of a metropolis, represented with spatial simplicity and volumetric rigor, in a figurative urban grid of stone, with a playful contrast between different depths and heights. The engraving of marble is a strong graphic sign that recalls the architectural environment of an imaginary Down Town, in a game of symmetries, contrasts and lights.

Stone City's play of geometry finds its preferential application in projects where marble and light are in perfect harmony, two physical elements in complete communication and mutual exaltation.

Stone City is modular natural stone decoration, provided in 60 x 60 cm format, 2 cm thick. Available finishes: Bianco del Re – Bianco Sivec – Persian Grey – Nero Marquina – Grigio Bardiglio Light

ZEN: Meditation in waves

Zen's lines are a celebration of the sinuosity of nature, the softness of the sea waves or the dunes of a desert of sand, an asymmetrical fluidity that instills a feeling of calm tranquility and connection to the earth.

A refined modulation enhanced by the processing of the material at different depths, with a play of reliefs that interacts with the veined textures of natural marble.

Zen is a modular decoration in natural stone, supplied in sizes cm. 60x60, thickness cm. 2.

Available materials Bianco del re – Crema Marfil – Persian Grey – Nero Marquina - Travertino Navona Travertino Titanium
